PRECAUTION

PRECAUTIONS

Precaution for Supplemental Restraint System (SRS) "AIR BAG" and "SEAT BELT PRE-TENSIONER"

INFOID:0000000004065075

The Supplemental Restraint System such as "AIR BAG" and "SEAT BELT PRE-TENSIONER", used along with a front seat belt, helps to reduce the risk or severity of injury to the driver and front passenger for certain types of collision. This system includes seat belt switch inputs and dual stage front air bag modules. The SRS system uses the seat belt switches to determine the front air bag deployment, and may only deploy one front air bag, depending on the severity of a collision and whether the front occupants are belted or unbelted. Information necessary to service the system safely is included in the SR and SB section of this Service Manual.

WARNING:

- To avoid rendering the SRS inoperative, which could increase the risk of personal injury or death in the event of a collision which would result in air bag inflation, all maintenance must be performed by an authorized NISSAN/INFINITI dealer.
- Improper maintenance, including incorrect removal and installation of the SRS, can lead to personal injury caused by unintentional activation of the system. For removal of Spiral Cable and Air Bag Module, see the SR section.
- Do not use electrical test equipment on any circuit related to the SRS unless instructed to in this Service Manual. SRS wiring harnesses can be identified by yellow and/or orange harnesses or harness connectors.

Precaution for Working with HFC-134a (R-134a)

INFOID:0000000004065076

WARNING:

- CFC-12 (R-12) refrigerant and HFC-134a (R-134a) refrigerant are not compatible. If the refrigerants are mixed compressor failure is likely to occur. Refer to [HA-3. "Contaminated Refrigerant"](#). To determine the purity of HFC-134a (R-134a) in the vehicle and recovery tank, use refrigerant recovery/recycling equipment and refrigerant identifier.
- Use only specified oil for the HFC-134a (R-134a) A/C system and HFC-134a (R-134a) components. If oil other than that specified is used, compressor failure is likely to occur.
- The specified HFC-134a (R-134a) oil rapidly absorbs moisture from the atmosphere. The following handling precautions must be observed:
 - When removing refrigerant components from a vehicle, immediately cap (seal) the component to minimize the entry of moisture from the atmosphere.
 - When installing refrigerant components to a vehicle, do not remove the caps (unseal) until just before connecting the components. Connect all refrigerant loop components as quickly as possible to minimize the entry of moisture into system.
 - Only use the specified oil from a sealed container. Immediately reseal containers of oil. Without proper sealing, oil will become moisture saturated and should not be used.
 - Avoid breathing A/C refrigerant and oil vapor or mist. Exposure may irritate eyes, nose and throat. Remove HFC-134a (R-134a) from the A/C system using certified service equipment meeting requirements of SAE J2210 [HFC-134a (R-134a) recycling equipment], or SAE J2209 [HFC-134a (R-134a) recovery equipment]. If accidental system discharge occurs, ventilate work area before resuming service. Additional health and safety information may be obtained from refrigerant and oil manufacturers.
 - Do not allow the refrigerant oil to come in contact with styrofoam parts. Damage may result.

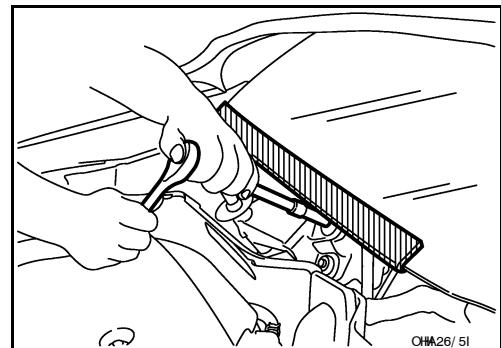

PRECAUTIONS

< PRECAUTION >

Precaution for Procedure without Cowl Top Cover

INFOID:000000004065077

When performing the procedure after removing cowl top cover, cover the lower end of windshield with urethane, etc.

FUNCTION DIAGNOSIS

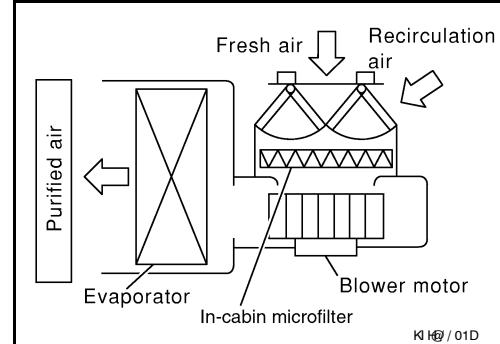

IN-CABIN MICROFILTER

Description

INFOID:000000004065079

FUNCTION

The air inside the passenger compartment is filtered by the in-cabin microfilters when the heater or A/C controls are set on either the recirculation or fresh mode. The two in-cabin microfilters are located in the front heater and cooling unit assembly.

REPLACEMENT TIMING

Replacement of the two in-cabin microfilters is recommended on a regular interval depending on the driving conditions. Refer to [MA-7, "Introduction of Periodic Maintenance"](#). It may also be necessary to replace the two in-cabin microfilters as part of a component replacement if the in-cabin microfilters are damaged.

IN-CABIN MICROFILTER

Removal and Installation

INFOID:0000000004065080

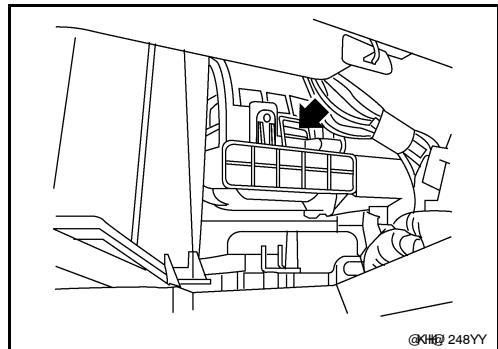

REPLACEMENT PROCEDURE

1. Open the lower glove box and press in on the sides so that it will open completely allowing it to hang by the cord.

V KHD / 12D

2. Depress the tab and remove the in-cabin microfilter cover as shown.

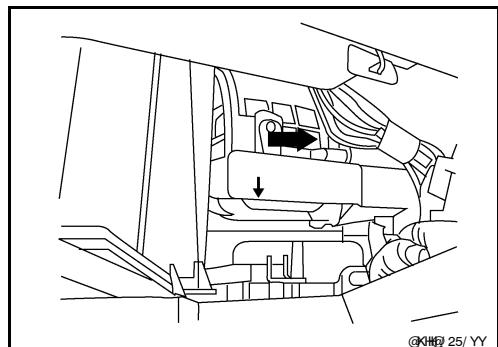

@KHD 248YY

3. Remove the in-cabin microfilters from the front heater and cooling unit housing.

4. Insert the first new in-cabin microfilter into the front heater and cooling unit housing and slide it over to the right. Insert the second new in-cabin microfilter into the front heater and cooling unit housing.

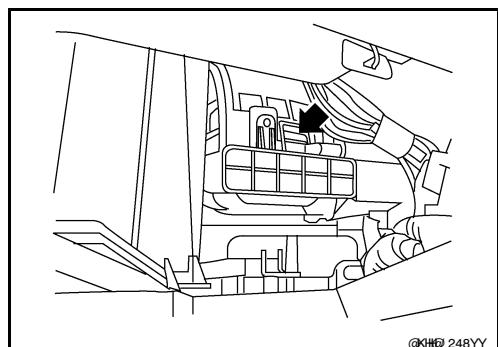

NOTE:

The in-cabin microfilters are marked with air flow arrows. The end of the microfilter with the arrow should face the rear of the vehicle. The arrows should point downward.

@KHD 25/ YY

5. Install the in-cabin microfilter cover, make sure the tab is locked in place as shown.

@KHD 248YY

6. Close the lower glove box completely.

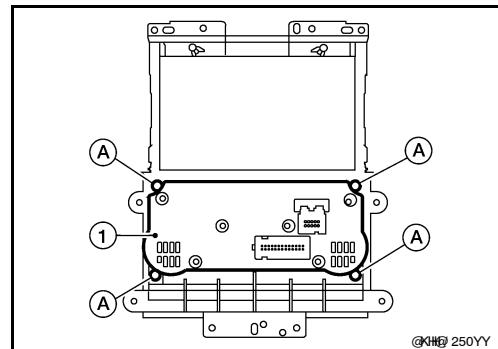

< ON-VEHICLE REPAIR >

ON-VEHICLE REPAIR**CONTROL UNIT****Removal and Installation**

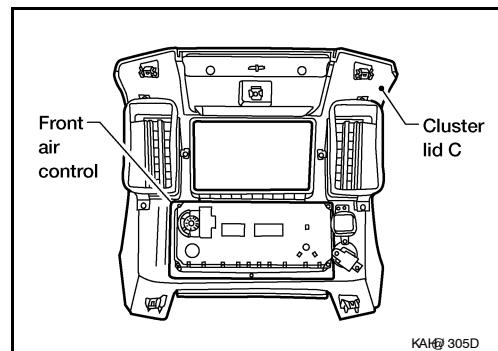

INFOID:000000004065081

FRONT AIR CONTROL**Removal**

1. Remove cluster lid C. Refer to [IP-10, "Exploded View"](#).
2. Remove the front air control from cluster lid C.
 - For type 1, remove the four screws (A) securing the front air control (1) to cluster lid C.

- For type 2, remove the four screws securing the front air control to cluster lid C.

**Installation**

Installation is in the reverse order of removal.

INTAKE SENSOR

Removal and Installation

INFOID:000000004065082

REMOVAL

1. Remove the front kick plate. Refer to [INT-17, "Removal and Installation"](#).
 2. Remove the lower dash side finisher. Refer to [IP-10, "Exploded View"](#).
 3. Remove the front pillar lower finisher. Refer to [INT-17, "Removal and Installation"](#).
 4. Remove the assist grip handle.
 5. Remove the front pillar upper finisher. Refer to [INT-17, "Removal and Installation"](#).
 6. Remove the lower glove box. Refer to [IP-10, "Exploded View"](#).
 7. Remove the upper glove box (cluster lid E). Refer to [IP-10, "Exploded View"](#).
 8. Disconnect the intake sensor electrical connector.
- NOTE:**
The intake sensor is located on the top of the front heater and cooling unit assembly next to the A/C evaporator cover.
9. Twist the intake sensor to remove the intake sensor from the front heater and cooling unit assembly.

INSTALLATION

Installation is in the reverse order of removal.

Removal and Installation

INFOID:0000000004065087

FRONT HEATER AND COOLING UNIT ASSEMBLY

Removal

1. Discharge the refrigerant from the A/C system. Refer to [HA-31, "HFC-134a \(R-134a\) Service Procedure"](#).
2. Drain the coolant from the engine cooling system. Refer to [CO-11, "Changing Engine Coolant"](#).
3. Disconnect the battery negative and positive terminals.

HEATER & COOLING UNIT ASSEMBLY

< ON-VEHICLE REPAIR >

4. Remove the front heater core pipes RH nut.
5. Disconnect the front heater core hoses from the front heater core.
6. Disconnect the high- and low-pressure A/C pipes from the front expansion valve.
7. Move the two front seats to the rear most position on the seat track.
8. Remove the instrument panel and console panel. Refer to [IP-11, "Removal and Installation"](#).
9. Remove the two front floor ducts.
10. Remove the steering column. Refer to [ST-13, "Removal and Installation"](#).
11. Disconnect the instrument panel wire harness at the RH and LH in-line connector brackets, and the fuse block (SMJ) electrical connectors. Refer to [PCS-8, "Component Parts Location"](#).
12. Remove the covers then remove the three steering member bolts from each side to disconnect the steering member from the vehicle body.
13. Remove the front heater and cooling unit assembly with it attached to the steering member, from the vehicle.

CAUTION:

- Use care not to damage the seats and interior trim panels when removing the front heater and cooling unit assembly with it attached to the steering member.
- Use suitable plugs on the heater core pipes to prevent coolant leakage.

14. Remove the front heater and cooling unit assembly from the steering member.

Installation

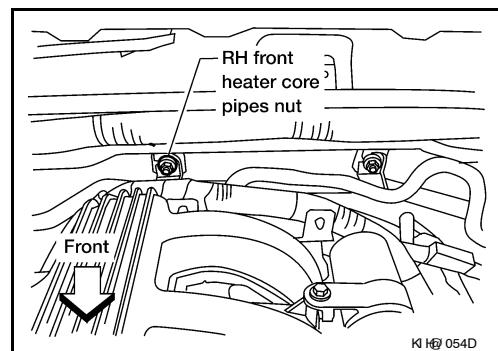

Installation is in the reverse order of removal.

CAUTION:

- Replace the O-ring of the low-pressure A/C pipe and high-pressure A/C pipe with a new one, and apply compressor oil to the O-ring for installation. Refer to [HA-29, "Component"](#).
- After charging the refrigerant, check for leaks. Refer to [HA-24, "Checking of Refrigerant Leaks"](#).

NOTE:

- Fill the engine cooling system with the specified coolant mixture. Refer to [CO-11, "Changing Engine Coolant"](#).
- Recharge the A/C system. Refer to [HA-31, "HFC-134a \(R-134a\) Service Procedure"](#).
